

PAR16 50watt 2pin Twist Lock GU10 Green

GU10 TRUE COLOUR LAMP

Our range of coloured GU10 halogen lamps use a dichroic filter lens to produce a colour beam of light. No gels or paints are used in the dichroic process, so True Colour offers a consistent coloured beam with no peeling or cracking of the coated lens. The lamps are exactly the same size as other GU10 halogen lamps so will fit into any GU10 fitting.
